

# **ENVIRONMENT SECTOR 3<sup>RD</sup> ANNUAL REVIEW**

**Experience of MOF in  
coordinating climate resilient  
projects/programs**

# ACHIEVEMENTS (FY2015-2016)

- Increased coordination/collaboration of major program funding and implementation across climate resilience and drm
- Strengthened integration of climate and disaster risks into core planning and development processes
- Development/strengthening of monitoring & reporting frameworks

# ISSUES AND CHALLENGES

# ISSUES AND CHALLENGES

- Institutional: institutional strengthening, mainstreaming, awareness
- Operational: program management, safeguards, procurement and financial management
- Technical: risk identification & reduction, ecosystem based risk based urban planning, risk financing etc

# LESSONS LEARNED

- Mainstreaming at the sector level enables sector to develop and implement cc and drm initiatives as part of their sector programs
- Coordination/collaboration across sectors is most effective for developing and implementing climate & disaster resilient programs

# UNFINISHED BUSINESS – GOING FORWARD – NESP 2017-2021

- Continue enhancing mainstreaming/improving on coordination, collaboration, systems, processes and planning including building capacity & expertise
- Strengthening information, information sharing and awareness and information management systems
- Pushing the use of financing mechanisms to enhance capacity and coordination (predictability, programmatic)
