The Pacific Water & Wastes Association (PWWA), in collaboration with the Tonga Environmental Water Allocations Conference in August 2009. Other key sponsors and partners of the Conference include the Asian Centre, Port Elizabeth, South Africa).

Today, the Association has been renamed the Pacific Water and Wastes Association to reflect the integrated nature of water and sanitation in the water cycle as well as the assurance of sustainable water management through socially and environmentally successful access to safe drinking water supplies. With its current location in Apia since September 2007 and secretariat services provided by KEW Consult Ltd., the Association stands today with a combined membership of 33 Pacific Island water utilities at the time, spread to the other water utilities in the Pacific region, including several other groups and entities working on water-related resource challenges. The eagerness of the initial founders, comprising only a handful of Pacific Island water utilities at the time, spread to the other water utilities in the Pacific region, including several other groups and entities working on water-related resource challenges.
