Organizational Structure 19
**Purpose**

MNRE leads the management of Samoa’s environment and natural resource. We work across a diverse range of issues as reflected in the core functions undertaken by the 14 Divisions. We work in partnership with a number of resource management Boards (Land, Forestry, Spatial Information & Water Resource) to advise, inform and support community and Government decision making and deliver services to the people and communities.

We also work with Government ministries, NGOs and the private sector. We have a responsibility to make sure that the benefits of sustainably managing our natural resources and the environment now and for future generations are understood and shared effectively.

Our purpose is to improve our environment and do more for the people and wildlife with the resources we have, while supporting the Government’s drive for economic and sustainable green growth.

We will work more closely with our key partners and communities and deliver our own work more efficiently.

**Who we are?**

Our work is guided by the Government priorities under the SDS, community values, aspirations, the state and condition of natural resources, and our legislative and policy mandates.

Significant work has been achieved under previous Plans and much focus will be placed on evaluating the beneficial impacts from these efforts including the development of a robust Monitoring & Evaluation framework to track any changes in the status of the environment. As the Ministry commences delivery of this Plan, the main challenge and commitment to be progressed include the effective implementation of the NESP. This puts in place a framework to allow MNRE to work with all line Ministries, Sectors, and stakeholders to work towards achieving a healthy, safe, productive and diverse environment for Samoa.

**Samoa State of the Environment Report 2013**

The Samoa SOE Report 2013 provides the evidence base against which to measure progress in protecting and improving the environment. It also provides a range of environmental indicators used to measure many of the environmental outcomes that we will strive to achieve through the NESP. The indicators will help focus MNRE activities and provide valuable resource on environmental monitoring and trends for use across government.

The need for environmental monitoring is critical for Samoa where our people depend on our lowland and coastal habitats for farming, developments, forests and seafood for day to day living requirements of food, shelter and energy.

The key findings in the SOE Report in particular on Impacts and Responses provide guidance on our Outcomes and Key Environment Sector Objectives in the NESP.
National Vision

Improved the quality of life for all.

Sector Vision

Samoa’s natural and built environments are well protected and resilient to natural and human-induced hazards, and supporting a sustainable and healthy human population.

Overarching Goal

Enhanced environment sustainability and improved climate and disaster resilience

Mission

Working together in close partnerships with communities and stakeholders for the pursuit of sustainable development.

Our Values

In accordance with our role as public servants, we observe the Code of Conduct and Values (Public Service Act 2004), we are passionate and proud of what we do and will strive to conduct work through:

- Christian principles
- VaTapuia
- Effectiveness and Efficiency
- honesty &Integrity
- Team Work
- Equity and Fairness
- Innovative
- Respect
- Faasamoa
- Trust
Our Workforce

Our success is dependent on the concerted efforts and commitments of our staff. We employ 453 people who are located in our main office at the Tui Atua Tamasese Efi (TATTE) Building and at other 5 different stations in Upolu and Savaii. (Forestry at Vailima, Togitogiga, Maota, Vaipouli and Asau, Disaster Management Office at Post Office Matafele and Faleata ), Meteorology Division at Mulinuu and Vaitele, CLAC & Projects at Tamaligi )

Our Mandatory Roles

1. An Environmental Regulator
   We are an environmental regulator – we target our efforts to maintain and improve environmental standards and to minimize unnecessary burdens on the environment.

2. An Environmental Administrator
   We are an environmental administrator – we are a national ministry. We work with people and communities to protect and improve the environment in an integrated way.

3. An Environmental Advisor
   We are an environmental advisor – we compile and assess the best available evidence and use these to report on the state of the environment. We provide technical information and policy advice to the government to support their roles in decision making.

4. An Environmental Advocate
   We are environmental stewards advocating for better environmental outcomes.
Division Objectives

The following objectives reflect the specific functions and responsibilities of each of the divisions. These are aligned with budget outputs as the achievements of these objectives are dependent on the financial provisions in the annual budget.

**Land Management**
To facilitate and implement sustainable land management practices and administration of land and land-based resources.

**Renewable Energy**
To promote climate change mitigation through energy efficiency and renewable energy.

**Water and Sanitation Sector Coordination**
To strengthen water sector governance and orientation.

**Forest Services**
To ensure sustainable development and management of forest resources across related sectors.

**Water Resources Services**
To integrate and implement sustainable water resource management across all relevant sectors.

**Legal Services**
To provide sound and timely legal services for the Ministry to support the sustainable development of natural resources and the environment.

**Environment and Conservation**
To implement sustainable development and management of biological resources and the environment including waste management.

**Technical Services**
To provide quality assurance, survey and spatial information services to support the sustainable development and management of natural resources and the environment.

**Meteorological Services**
To provide meteorological, geoscience, climate change and disaster risk management services in support of sustainable development of natural resources.

**Planning & Urban Management Services**
To manage sustainable planning and development services and outcomes through the implementation of the Planning and Urban Management Act.

**Corporate Services**
To provide efficient HRM and financial services and effective capacity building and public awareness to support sustainable development of natural resources and the environment.

**Disaster Management Office**
Mainstreaming the disaster risk management framework in all sectors to ensure sustainable risk reduction and preparedness, effective response and durable recovery from any disaster.

**Information and Communication Technology**
To provide effective and efficient information, communications, and technology to support the sustainable development and management of the country’s natural resources and environment.

**Global Environment Facility Services –**
 donor Support Assist with finalizing Samoa’s priorities for environmental protection and restoration through the GEF-Pacific Alliance of Sustainability Framework and other funding sources.

**Environment Coordinating Unit**
Ensure coordinated efforts amongst all stakeholders for optimum results.
## OVERARCHING GOAL: ENHANCED ENVIRONMENTAL SUSTAINABILITY AND IMPROVED CLIMATE AND DISASTER RESILIENCE

Institutional Framework – Structure

The successful implementation of the CP depends strongly on the availability of adequate human resources with relevant capacity, skills and qualities. Thus, recruitment is the key to a strengthened workforce and to be responsive to the ever-increasingly competitive market to secure suitably qualified and capable staff at all levels. In support of the Ministry’s corporate vision, its employees are assets whose values are enhanced by development in order to foster creative and innovative contributions to Samoa’s national productivity.

The current organizational structure comprised of 14 divisions with an increased workforce of 422 staff.
